

Phostrol[®] Pro

Fungicide

Activate Turf Defence

Phostrol[®] Pro is an extremely systemic phosphite fungicide and unique Plant Defense Activator labelled for the control of Anthracnose, Pythium blight and now Microdochium Patch. With both direct and indirect modes of action, **PhostrolPro** provides an effective, convenient and flexible tool for the management of these diseases. Due to the mode of action on target fungi and the involvement of host defenses in disease suppression, **PhostroPro** has a low resistance risk.

**1st Phosphite
registered for
Microdochium Patch
in Canada**

Active Ingredient

Mono & dibasic sodium, potassium & ammonium phosphites

Fungicide Group

Group PO7

Formulation

Liquid

Phytomobility

Xylem & Phloem mobile

Package Size

2 x 10 L, 200 L, 1000 L
