

Winter Hardiness™

Give your turf the best chance of survival and spring performance with biweekly applications of Turf Fuel's University proven Winter Hardiness Program. Turf Fuel's Element 6® and Base K26™ treated turf had the highest percentage of regrowth 20 days after removal from either 40 or 60 days of ice cover. Turf Fuel Mitigate MZ resulted in reduced disease symptoms throughout the winter.

RECOMMENDED

ELEMENT 6® 
3 fl.oz / 1,000 ft²

Provides plants with the components needed for turf strength conditioning, maximum energy generation and root production. Powered by university proven NUTRIFENSE® technology.

BASE K26™
6-9 fl.oz / 1,000 ft²

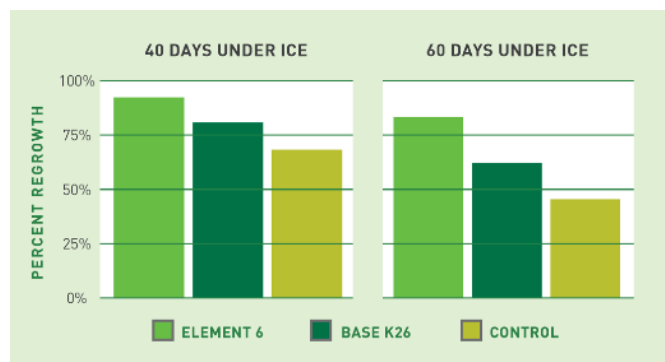

A high K formulation utilizing an ultra safe and highly absorbed potassium acetate fortified with proprietary G2D™ biostimulant technology.

Mitigate MZ™ 
3 fl.oz / 1,000 ft²

Condition your turf to tolerate the stress of winter with Manganese, Zinc, sea kelp, and Turf Fuel's proprietary Templar stress-fighting biostimulant technology. Improved color, stronger plant health, and reduced stress.
