

Summer Endurance™

During the spring, turf thrives and performs at it's highest level. Once the temperature and humidity rise, energy, stress tolerance and density bleed out of the plant as heat stress sets in. Turf Fuel's Summer endurance program delivers the critical nutrients and energy forms to help turf sustain optimum quality right through the dog days.

RECOMMENDED

ELEMENT 6®

3 fl.oz / 1,000 ft²

Provides turf with the components needed for strength conditioning, maximum energy generation and root production. Powered by university proven NUTRIFENSE® technology.

MITIGATE MZ

3 fl.oz/ 1,000ft²

This powerful combination of manganese, zinc, sea kelp, amino acids containing both Templar and Reaction technology aids in heat and drought stress.

RESPO Fuel™

3 fl.oz / 1,000 ft²

Respo Fuel® was engineered to provide the ingredients needed to slow respiration, increase plant energy, and promote root development. Respo Fuel® is critical during times of photorespiration.

PRODUCT RATE RECOMMENDATIONS

3-4 DAY INTERVAL Intense Stress Times

Apply 2 fl.oz of Element 6, 2 fl.oz Mitigate MZ and Respo Fuel per 1,000 ft²

14 DAY INTERVAL - Maintenance

Apply 3 fl.oz of Element 6, 4 fl.oz Mitigate MZ and Respo Fuel per 1,000 ft²
