

TARGET SPECIALTY PRODUCTS™

Introducing Turf Fuel — PeaK

NEW
PRODUCT ALERT

0-15-15 Energy Activation

PeaK™ is a concentrated combination of phosphorus, potassium, magnesium, and Turf Fuel's proprietary Reaction and Nutrifense Technologies. PeaK supports critical energy processes via the ATP cycle, enzyme activation, and photosynthesis, promoting canopy density, root development, and stress tolerance. The unique combination of nutrition and plant and soil health technologies in PeaK gives turf the resources it needs to perform through the demands of all seasons.

15 P Phosphorus 30.974

Phosphorus —

supports ATP-based energy transfer and energy intensive processes involved in root growth maintenance and recovery.

19 K Potassium 39.0983

Potassium —

supports osmotic regulation, stomatal function, enzyme activation, and movement of water and solutes within the plant.

12 Mg Magnesium 24.305

Magnesium —

is the central structural component of chlorophyll and supports photosynthesis and enzyme function.

Seaweed Extract —

supports root development, turf density, photosynthetic performance, and stress tolerance.

15 PeaK 19

Key Technologies:
Reaction Technology,
Nutrifense,
Seaweed Extract

Derived From:
Potassium Phosphate,
Magnesium
Glucoheptonate

Application Rate:
3 - 6 fl. oz. / 1,000 sq. ft.
every 7 - 14 days.
Net Weight: 11.87 lbs / gal

Also powered by REACTION PLANT • ROOTS • SOIL + NUTRIFENSE *technology*

Promotes defense mechanisms, plant nutrtion, and soil health.
