Maximize Moisture
Efficiency

Increase Irrigation
Performance

AquaNox™ is a moisture management tool, designed to improve the overall efficiency of irrigation systems and capitalize on moisture events. AquaNox employs four separate components that maximize the distribution and retention of moisture throughout the soil profile. AquaNox is an excellent tank mix partner for chemistries that require uniform soil distribution.

FEATURES AND BENEFITS

- Improves soil moisture capacity
- Reduces watering demand
- More uniform moisture distribution
- Flexibility to spray or inject
- Economical for season-long use

Application Instruction:

Injection System - Use 1 - 2 qt. / acre • Apply every 7 - 10 days. For best results use 2 qt. rate for initial application.

Sprayed - Use 1 - 2 qt. / acre • Apply every 7 - 10 days. May be applied in tankmix combination with pesticide and fertilizer products.

AquaNox is not intended to treat pre-existing localized dry spot. Soil surfactant products should be used if LDS is present.
