

D-Solve™

SODIUM & BICARBONATE MITIGATION

**Increases
Infiltration Rates**

High Acid Value

**Fights Sodium and
Bicarbonate**

Many turf stands suffer from poor irrigation water quality. High levels of sodium and bicarbonates lead to reduced infiltration rates, gas exchange, and overall turf quality. **D-Solve™** is a proprietary blend of acids and a soil penetrating surfactant that work to dissolve bicarbonate layering and increase calcium and magnesium availability. Calcium in soil solution works to replace sodium on the soil's cation exchange system.

FEATURES AND BENEFITS

- **Worker safe**
- **Environmentally safe**
- **Equipment safe**

Application Instruction:

32 - 64 fl. oz. / Acre in 1 - 2 gal. / 1,000

Apply weekly, biweekly, or monthly as soil testing warrants.

TFDSLVS-02/20
